# Computing – Technology around us

| | |
|---|---|
| mouse | A handheld device that controls the cursor on a computer. |
| keyboard | A device that allows a person to enter letters, numbers and symbols onto a computer. |
| compare | To look at the things that are the same or different. |
| sort | To arrange or group objects in a special way. |
| digital technology | Electronic tools that help us learn, work and play. |
| purpose | The reason for why something is done. |

technology

E-safety

## Sticky knowledge:

- Technology is things made by people that help us.
- Technology can be purposefully used to create, organise, store, manipulate, and retrieve digital content.
- A website is an information page on the internet.
